SK 500 VERTICAL WASHING MACHINE

SK 500 VERTICAL WASHING MACHINE

SK 500 VERTICAL WASHING MACHINE

SK 500 Vertical Washing Machine model has a precision brush structure, with its powerful fan system that can perform quickly wash Low-E and coated glasses. The user-friendly touch-screen control panel, with its compact and powerful design, enables quick and high quality glass washing. Thanks to its strong construction and corrosion-resistant material construction, the cost of maintenance and spare parts of SK 500 Vertical Washing Machine is extremely low

**EXTREMELY
LOW
MAINTENANCE
COST**

SK 500 VERTICAL WASHING MACHINE

GLASS WASHING CAPABILITY

Glass washing capability is up to 19 mm glass thickness. SK 500 is designed for washing and drying float glass, laminated, colored-coated glass and low-E glass.

SPECIAL MOVEMENT SYSTEM

WATER-CONTACTED PARTS ARE MADE UP OF COATED MATERIAL

All parts in contact with water are made from stainless steel / coated material against corrosion.

Thus, it also has special bearings and special washing brushes.

STAINLESS STEEL / COATED MATERIALS AGAINST CORROSION

EVERY BRUSH IS
DRIVEN BY ITS OWN
SEPARATE MOTOR.

SK 500 VERTICAL WASHING MACHINE

LOW-E AND COLORED-COATED GLASS SURFACE

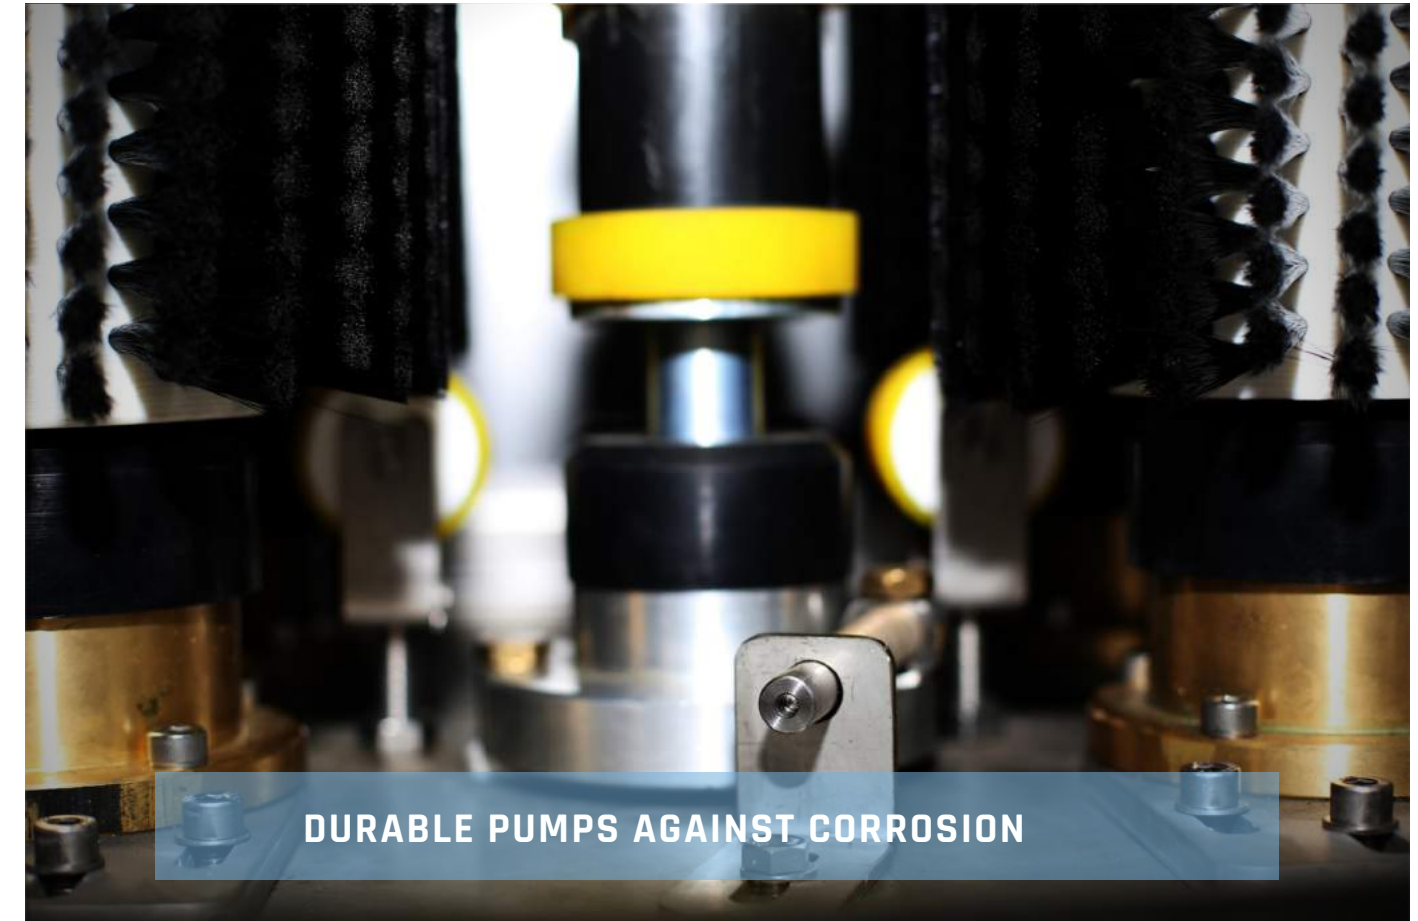

Three (3) set of glass washing brushes ,which leave no scratches on Low-e and colored-coated glass surfaces

NOZZLE SYSTEM

Nozzle system which can spray water in wide openings

**TWO SEPARATED
STAINLESS STEEL WATER
TANK WITH A 520 LT.
CAPACITY IN TOTAL**

PERFECT SEPARATION BETWEEN WASHING SECTIONS

DURABLE PUMPS AGAINST CORROSION

WATER LEVEL MEASUREMENT SYSTEM

Water can be heated by electrical-resistance to use in pre-washing section and first brush set

Cold water tank capacity is 370 liters, besides the capacity of the hot water tank is 150 liters.
